

Chile battery solar container battery

Overview

How will a solar battery storage system benefit Chile?

The battery storage system will not only store solar power but can be activated as needed and will also contribute to Chile's security of supply through instantaneous reserve and black-start capability.

Should solar batteries be used in Chile?

Attendees at the Energy Storage Summit Latin America hosted by our publisher Solar Media in October last year heard that with solar PV in Chile—one of the sunniest countries in the world, particularly in the Atacama Desert region—at risk of rampant curtailment, the addition of batteries is being seen as a necessary mitigation of that risk.

Does greenergy have a solar-plus-storage project in Chile?

Greenergy has raised financing for the fourth phase of a solar-plus-storage project in Chile set to feature 11GWh of battery storage capacity when completed.

What is the largest battery storage project in South America?

One of the largest battery storage projects in South America is being built in the Chilean Atacama desert. It complements the existing 220 MW PV power plant Diego de Almagro Sur operated by the electric utility company Colbún S.A. Since 2022, the plant has been supplying the region with solar power using SMA technology.
