

China-Africa Subsidized PV Inverters

Overview

Has China built a solar power plant in Africa?

Yes, China has made strides in building solar power plants in Africa. For example, China's government financed the construction of a utility-scale 50 megawatt (MW) solar plant in Kenya — the first of its kind in the country.

Does China have an Africa Solar Belt?

China's first major program under its new strategy of shifting overseas renewable energy investments toward smaller-scale initiatives is the Africa Solar Belt.

Will China close electricity access gaps in Sub-Saharan Africa?

As China hosts the 2024 Summit of the Forum on China-Africa Cooperation (FOCAC) this September, closing electricity access gaps in sub-Saharan Africa must be top of the agenda. Recently, China committed to shift its overseas renewable energy investments toward smaller-scale initiatives that prioritize social benefits.

What is the Africa Solar Belt initiative?

The first major program under the new Africa-China cooperation strategy is the Africa Solar Belt initiative. This key initiative of the Forum on Africa-China Cooperation aims to invest in solar energy infrastructure in Africa. China has a long history of investing in energy infrastructure overseas, with its Belt and Road Initiative investing over \$1 trillion in infrastructure in more than 150 countries.
