

Container outdoor generator set installation

Overview

This article will provide a detailed introduction to the installation points of containerized diesel generator sets, covering the entire process from site preparation to final commissioning, ensuring that you can complete the installation smoothly and allow the generator set to operate safely and efficiently. How do I install a new generator outside?

Outdoor installation. Outdoor installation begins with the pouring of reinforced concrete pads sufficient for the size, shape, weight and footprint of the new generator.

What is a containerized generator set?

() On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

How to install a generator set?

For lifting the set to install it, the lift points provided on the base frame shall be used. The generator set base frame is specially designed for ease of moving the set. Points of attachment shall be checked for cracked welds or loose nuts and bolts before lifting. A spreader bar is required to prevent damaging the set.

How do I install a new diesel generator?

Indoor installation of a new diesel generator can be more complicated than outdoor installation. Depending on your facility, a gantry crane or skid mounted may be required to locate the generator. As with outdoor installations, the first step is to confirm that the foundation is strong enough to support the weight of the diesel generator.
