

Copenhagen Valley Electric Energy Storage Device Supply

Overview

Who will supply Copenhagen Energy's 132 MWh Everspring battery energy storage system?

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will be supplied by Huawei Digital Power. Image: Huawei Digital Power. Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power.

How did Copenhagen Energy Invest in Everspring?

Copenhagen Energy reached a final investment decision (FID) on the Everspring portfolio earlier in 2025. In June, it secured financing for the two sites under an agreement with regional bank Ringkjøbing Landbobank. In July, Danish company Energrid was hired as the engineering, procurement, and construction (EPC) contractor for the projects.

How will a Bess project help Denmark's energy grid?

Denmark's energy grid, which has been a frontrunner in incorporating wind power, remains exposed to periods of imbalance and price fluctuation, and BESS installations will offer useful management and optimization. The Everspring portfolio, financed by Ringkjøbing Landbobank, is intended to provide flexible capacity to the Danish grid.

What is a battery storage project?

Our goal is to build an integrated business where technology, power trading, and development work together to create long-term value. Initiating a battery storage project involves ensuring proximity to the grid's transmission level, with a screening process initiated with grid operators to assess available capacity.
