

# **Copenhagen solar Energy Storage BESS**

## Overview

---

Danish renewable energy developer Copenhagen Energy has partnered with a local electricity and fibre network distributor Thy-Mors Energi to set up a 100MW PV and battery energy storage system (BESS) project in Ballerum, about 370km from Copenhagen. How will a Bess project help Denmark's energy grid?

Denmark's energy grid, which has been a frontrunner in incorporating wind power, remains exposed to periods of imbalance and price fluctuation, and BESS installations will offer useful management and optimization. The Everspring portfolio, financed by Ringkjøbing Landbobank, is intended to provide flexible capacity to the Danish grid.

What is European energy's new Bess project?

European Energy's new BESS project marks a significant step in the company's strategy to support the integration of renewable energy systems and improve energy efficiency in Denmark and beyond.

What is a battery energy storage system (BESS)?

The project in Hasle is the largest battery energy storage system (BESS) in the country, EWII said, and will provide flexibility services to transmission system operator (TSO) Energinet as it decarbonises the grid. It is comprised of 116 battery units.

Who will supply Copenhagen Energy's 132 MWh Everspring battery energy storage system?

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will be supplied by Huawei Digital Power. Image: Huawei Digital Power. Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power.
