

Dakar lithium energy storage power supply customization

Overview

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”.

What is battery energy storage?

What is Battery Energy Storage ?

Battery energy storage is an advanced technology that enables the capture and release of energy stored in batteries. This can be done to support the grid, provide backup power, or even store energy generated by renewable resources like solar and wind.

What types of energy storage solutions do you offer?

We offer commercial and industrial energy storage system solutions. Our air-cooling and liquid-cooling ess cabinets are safe, all-in-one solutions that are easy to maintain. Designed to meet a variety of energy storage needs, click to learn more about how our energy storage solutions can benefit your business.
