

Delivery time for 15kW solar container

Overview

How are solar panels shipped?

Most solar panels are shipped via 20ft or 40ft containers. Depending on the quantity, you may choose between FCL (Full Container Load) or LCL (Less than Container Load). FCL: If you are importing a large number of solar panels, booking a full container is cost-effective and provides better security for your goods.

Can heavy solar equipment be delivered in a shipping container?

Heavy solar equipment can't always be delivered in a standard shipping van or shipping container, it's at risk of being damaged during transit, and it needs to arrive onsite according to energy project timelines. Effective supply chain management requires top-notch renewable energy logistics.

How much does a solar panel shipment weigh?

The exact weight and dimensions of a solar panel shipment varies widely across different models. Assuming a weight of around 50 lbs per commercial solar panel and a pallet that fits about 30 panels, a single pallet of solar panels could weigh upwards of 1500 lbs.

How to ship solar panels from China?

Shipping Methods You have two main shipping options when importing solar panels from China: sea freight and air freight. Each has its advantages, depending on your needs. Sea Freight: Sea freight is the most economical option, particularly for large shipments. It takes longer but significantly reduces costs per unit.

Delivery time for 15kW solar container
