

Discount available for high-temperature resistant energy storage containers used in environmental protection projects

Overview

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

What is a high temperature storage material?

The main technological innovation of the company relies on the developed high temperature storage material in the form of purposely produced pellets or bricks, with high heat capacity and thermal conductivity.

Are thermal energy storage technologies a key enabler of industrial decarbonization?

In this context, thermal energy storage (TES) technologies have the potential to be a key enabler of increased renewables penetration and industrial decarbonization.
