

Djibouti City Energy Company uses 2MWh photovoltaic energy storage container

Overview

What is Djibouti's new solar project?

The project will be the first solar Independent Power Project (IPP) in Djibouti and will be located in Grand Bara, south of Djibouti City. The solar project is being fully developed by AMEA Power under a Build-Own-Operate and Transfer (BOOT) model and will generate 55 GWh of clean energy per year, enough to reach more than 66,500 people.

Who will take over the Djibouti electricity project?

The Sovereign Fund of Djibouti (FSD) will be joining the project before financial close as a minority shareholder. The offtaker for the project will be Electricité de Djibouti. As part of its strategic plan, the Government of Djibouti aims to reduce CO2 emissions by around 40% by 2030.

Who signed the Djibouti Solar Power Project (IPP)?

The signing was witnessed by the Minister of Energy and Natural Resources, H.E. Yonis Ali Guedi. The project will be the first solar Independent Power Project (IPP) in Djibouti and will be located in Grand Bara, south of Djibouti City.

What is the source of Djibouti's energy?

Approximately 65 percent of Djibouti's electricity comes from external sources. The remaining energy comes from its own geothermal, solar, wind, and biomass sources. According to the International Renewable Energy Agency (IRENA), this reliance on imported energy can lead to price volatility that can hinder economic development plans.
