

Dodoma Solar Panel solar Power Generation Project

Overview

Will a solar power plant strengthen Tanzania's electricity grid?

According to Emmanuel Tutub, the project aims to strengthen the grid of the state-owned Tanzania Electric Supply Company (Tanesco). The future solar power plant, which will probably be the largest in the country with a capacity of 150 MWp, will diversify Tanzania's electricity mix.

Will a 150 MWp solar photovoltaic power plant work in Tanzania?

The Tanzanian government has just signed an agreement with the French Development Agency (AFD) to finance a 150 MWp solar photovoltaic power plant. The financial arm of French foreign policy is granting 137 million euros to the Tanzanian government for the implementation of this project, which will eventually diversify Tanzania's electricity mix.

How much money will AfD provide for a solar power plant?

AFD is providing an additional 7 million euros in financing for the feasibility study for this plant which will be located in Kishapu, a district in the Shinyanga region in northern Tanzania. The construction of the solar power plant is planned to take one year, between March 2022 and March 2023.

How long does it take to build a solar power plant?

The construction of the solar power plant is planned to take one year, between March 2022 and March 2023. According to Emmanuel Tutub, the project aims to strengthen the grid of the state-owned Tanzania Electric Supply Company (Tanesco).
