

Does an air freight box need to be used when sending a mobile power bank by air

Overview

Can I send batteries through air freight?

When sending everyday lithium metal (non-rechargeable) batteries by air freight, you must send them inside the product they work in. For example, if you send your TV remote and choose to send your current half-used AAA batteries as well, the batteries must be sent inside the TV remote.

Can I send Spare lithium batteries by air freight?

You cannot send loose spare lithium metal batteries by air freight. Sending lithium-ion batteries by air freight is similar to the rules you must follow when sending lithium batteries by sea freight. You can choose to send them inside their respective devices, or you can send them separately in a container with a hard case.

Can you move lithium ion batteries by air freight?

When considering your equipment seek options where your batteries fall within these categories. Finally, there are both Lithium Ion and Lithium Metal batteries on the market. In general, it is easier to move Lithium Ion batteries by air freight as they are more exempted from regulations.

Why are lithium batteries difficult to ship by air freight?

Lithium batteries power everything from phones to cars to medical devices, yet they are among the most difficult items to ship by air freight! Many countries and virtually all airlines have strict regulations regarding the shipment of lithium batteries because they have the potential to cause catastrophic damage to aircraft if anything goes wrong.
