

Double-glass solar panels installed in the carport

Overview

What is a solar carport?

Unlike traditional carports that simply offer shade and weather protection, solar carports serve the dual purpose of energy production and vehicle shelter. Solar carports function identically to traditional rooftop solar systems in terms of energy generation. The key components include:.

Can PV panels be installed on a solar carport structure?

Yes, PV panels can be installed on a solar carport structure. Installing PV panels on a solar carport makes great use of an otherwise unproductive space at both the domestic and commercial level.

Is a double solar carport easy to install?

The Double Solar Carport is easy enough for DIY installation. However, solar electrical connection must be done by a fully qualified certified electrician. Installation will generate STC's (Small-scale Technology Certificates).

Can a solar carport be installed on a roof?

While rooftop solar panels require an existing structure, solar carports can be standalone installations. They offer flexibility in placement, making them ideal for locations with insufficient roof space.
