Shanghai has put in place 1,526 green charging pile units since the beginning of this year for recharging new energy vehicles, State Grid Shanghai Municipal Electric Power Co said.

Why are charging piles important?

Charging piles are of great significance to developing new energy vehicles, and they are also an important part of the emerging digital economy such as intelligent traffic and intelligent energy. The State Grid Corporation of China (SGCC) is taking an active role in the development of new energy vehicles.

What are charging piles for new energy vehicles?

As one of the new infrastructures, charging piles for new energy vehicles are different from the traditional charging piles. The "new" here means new digital technology which is an organic integration between charging piles and communication, cloud computing, intelligent power grid and IoV technology.

What is a charging pile service system?

O&M: The charging pile service system is large in scale and complicated in organization. H3C uses its unified O&M software to provide users with a panoramic O&M solution that helps users extend to service applications upward and cover special charging and transforming devices downward. III.
