

EK Smart Charge Energy Storage Charging Pile

Overview

Can battery energy storage technology be applied to EV charging piles?

In this paper, the battery energy storage technology is applied to the traditional EV (electric vehicle) charging piles to build a new EV charging pile with integrated charging, discharging, and storage; Multisim software is used to build an EV charging model in order to simulate the charge control guidance module.

How to control the energy storage charging pile device?

the mobile and Web clients to be called. The user can control the energy storage charging the energy storage charging pile device via the NB network. The cloud server provides services for three types of clients. The first entrance is for reservation, and other commands from the server. The second entrance is for the mobile through this entrance.

How to reduce charging cost for users and charging piles?

Based Eq. , to reduce the charging cost for users and charging piles, an effective charging and discharging load scheduling strategy is implemented by setting the charging and discharging power range for energy storage charging piles during different time periods based on peak and off-peak electricity prices in a certain region.

How does the energy storage charging pile's scheduling strategy affect cost optimization?

By using the energy storage charging pile's scheduling strategy, most of the user's charging demand during peak periods is shifted to periods with flat and valley electricity prices. At an average demand of 30 % battery capacity, with 50-200 electric vehicles, the cost optimization decreased by 18.7%-26.3 % before and after optimization.

EK Smart Charge Energy Storage Charging Pile

Shanghai's first smart mobile facility for photovoltaic storage

Feb 12, 2025 · Situated on Sanhui Road, the station is equipped with two building integrated photovoltaic, one intelligent and mobile vehicle for energy storage and charging, as well as 22 ...
