

Easy to install solar system

Overview

How do I install solar panels?

Install Panel Mounts: Safely access your roof and install the panel mounts on the south-facing side of your home. **Install Panels:** Once the mounts are securely attached, install panels such as the EcoFlow 400W Rigid Solar Panels to complete your array. **Secure Wiring:** Next, add the wiring and connect the panels.

Should you DIY a solar panel system?

Setting up a solar panel system can be one of the most exciting home projects you'll ever take on, whether you're ready to tackle it yourself or prefer to bring in the pros. DIY offers that hands-on satisfaction—the thrill of piecing together your own energy source, step-by-step, right on your roof.

What are DIY solar panels?

As the name suggests, DIY solar panels are solar panel kits that you can assemble and install by yourself or with a bit of help.

What do you need to install a solar panel?

For roof installations, you'll require a sturdy ladder, roof brackets, and fall protection gear. Specific solar panel mounting hardware, such as rails, clamps, and bolts, is required to secure the panels. You'll also need electrical components like MC4 connectors, solar cables, and a junction box.
