

Energy Storage and New Energy Cooperation

Overview

What is a new energy cooperation framework for energy storage and prosumers?

A novel energy cooperation framework for energy storage and prosumers is proposed. A bi-level energy trading model considering the network constraints is presented. A profit-sharing mechanism is designed with the asymmetric Nash bargaining model. The adaptive alternating direction method of multipliers is applied efficiently.

Does shared storage cooperation improve the economic viability of SES?

User 5 has the highest profit, reaching 7930.1 ¥, benefiting from compensation for providing a large amount of renewable energy to the alliance. Participating in shared storage cooperation can effectively improve the economic benefits for all parties involved. The above results confirm the economic viability of SES. Table 5.

Can a new energy cooperation framework improve the energy economy?

A novel energy cooperation framework for CESSs and prosumers is proposed with an energy cooperation platform as an intermediary, improving the energy economy and solution efficiency.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.
