

# **Energy company s 100kWh photovoltaic container service quality**

## Overview

---

What is Konja solar energy solution?

Conventional power generation methods are not only expensive but also environmentally impactful. Thus, these areas require an innovative solution. Konja Solar Energy Solution: 1. Solar Panels: We first install a large number of solar panels to harness the renewable energy from the sun.

How many MWp a photovoltaic power plant has been built?

Photovoltaic power plants successfully built by us have added up to 800MWp. We have formed sunshine industry alliances with many famous enterprises. So far, we have more than 1000MWp project reserves . We will keep a 30%-50% annual growth rate in photovoltaic project development.

What is a solar power system?

Compatible with PV, wind, and thermal power systems, thereby facilitating renewable energy utilization, power output smoothing, peak shifting, frequency regulation and peak load leveling, and also providing auxiliary services to the power grid. It is widely used in power generation, transmission, distribution, and utilization.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.
