

Energy storage integrated solar street light

Overview

What is a solar street light system?

A solar street lamp system is a lighting system for the illumination of streets, roads, squares, and common public areas. It uses the sun's light to work. solar powered street light is the complete set of Solar Panel, Lithium Battery, Light, Charge Controller & Poles. There are two designs split solar street light and integrated solar street light.

Why should you choose Hei solar LED street lights?

HeiSolar focus on developing and manufacturing customized outdoor solar LED lighting systems for a wide range of lighting applications. Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways.

What battery does a solar street light use?

Integrated solar street light usually use lithium battery as energy storage. Lithium battery are divided into ternary lithium batteries and lithium iron phosphate batteries (LiFePo4 batteries), Lithium battery is a key component in solar street lights, and the cost is also the highest.

Why should you choose integrated solar street lights?

Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways. Installation is very easy and price per street light unit is cheaper than other brands.
