

Energy storage power station investment tens of millions

Overview

Where are energy storage units located in China?

Technicians check equipment at an energy storage station in Yongzhou, central China's Hunan province. [Photo/Lei Zhongxiang] On a mountain pass in Jiawa village, Qusum county, Shannan, southwest China's Xizang autonomous region, rows of energy storage units hum quietly beside a solar-storage power station.

How many kilowatts is China's energy storage capacity?

According to China's National Energy Administration (NEA), by the end of 2024, the total installed capacity of new energy storage projects in China reached 73.76 million kilowatts, representing an increase of over 130 percent compared to the end of 2023.

Why is energy storage important in China?

[Photo/Ren Yigang] As China accelerates the shift toward renewable energy and builds a new type of power system, energy storage has become indispensable.

What is China's largest 'coal-to-power plus molten salt' storage project?

By the end of July, within the service area of China's State Grid, the maximum dispatchable power from new-type energy storage reached 64.23 GW, with a real-time maximum discharge of 44.53 GW, up 55.7 percent from last year. Photo shows China's largest "coal-to-power plus molten salt" storage project in Suzhou, east China's Anhui province.
