

# Energy storage power supply manufacturer moves to new factory

## Overview

---

How many megapacks will Shanghai megafactory supply?

The newly opened Shanghai Megafactory is expected to supply Megapacks for the new energy storage station. The factory has a targeted annual capacity of 10,000 Megapack units, equal to 40 GWh of storage. Are you buying a Tesla?

.

Where is Tesla's first energy storage plant located?

Tesla's first overseas energy storage plant starts operating as global competition from Chinese firms and pricing pressures mount. Tesla has officially announced the start of production at its Shanghai energy storage factory, the company's first Megapack manufacturing facility outside the United States.

Why is Tesla building a megafactory?

That's mainly due to its Megapacks, its popular utility-scale energy storage systems, and the production ramp at its Megafactory in California, where it produces those battery packs. Tesla has ramped up production at the plant with a capacity of 40 GWh. The company has also been building its second Megafactory, this one in Shanghai, China.

Why is Tesla launching Megapack production in Shanghai?

The launch of Megapack production in Shanghai positions Tesla to capture a larger share of the rapidly growing global energy storage market while strengthening its footprint in China's renewable energy sector.
