

# **Entry requirements for solar container outdoor power in Slovenia**

## Overview

---

How many solar power plants are there in Slovenia?

In 2022, 12,698 solar power plants with a total capacity of 227.6 megawatts (MW) were connected to the grid in Slovenia and 18,034 solar power plants with a total capacity of 411.8 MW in 2023. In total, 49,092 solar power plants with a total capacity of 1,104.5 MW were in the system on 31 December 2023.

Where can solar panels be allowed?

These will be allowed on existing buildings, facades, balconies and car parks regardless of their size as well as in the wide areas of roads, railways, electricity production facilities and landfills. Solar panels will also be allowed in areas of future industrial zones. Incentives, but no fines.

Where can a solar power plant be set up?

The rules, introduced by a government regulation, also set out where it is possible to set up solar power plants. These will be allowed on existing buildings, facades, balconies and car parks regardless of their size as well as in the wide areas of roads, railways, electricity production facilities and landfills.

Will solar panels get a construction permit in 2023?

No fines are envisaged, but the investors obligated to set up solar panels who will not follow the new rules will not get a construction permit. The government regulation is based on a 2023 law designed to expedite the deployment of renewable electricity generation facilities.
