

Estonia solar air conditioner service life

Overview

How do I extend the life of my HVAC system?

Below are a few tips and tricks we've found helpful in extending the life of your system: Changing or cleaning your air filters every 1-3 months (depending on system usage, climate, allergies, pets, etc.) helps prevent airflow restrictions and allows your system to operate efficiently without extra wear and tear.

What factors affect your HVAC system life expectancy?

The factors that impact your HVAC systems life expectancy include: System Type: Some system types last longer than others, in general. Climate: Harsh climates will cause HVAC systems to burn out quicker than those operating in more mild climates.

How long do HVAC systems last?

For comparison, a system that's running in a more mild climate (no extreme heat, cold, dust, rain, etc) can have an average life expectancy of 15-25 years if maintained properly. Some people run their HVAC systems year-round, while some only run it seasonally at their second home. This table breaks down how usage patterns affect the lifespan:.

When did ASHRAE publish a service life estimate for HVAC equipment?

An article discussing this issue, "Determining Equipment Service Life" was published in the August 2000 ASHRAE Journal. Table 4, Comparison of Service Life Estimates, 2015 ASHRAE Handbook - HVAC Applications, gives information for a number of types of HVAC equipment. This data is based on a limited survey conducted in 1978.
