## Overview

---

Where are vanadium flow batteries installed?

A vanadium flow-battery installation at a power plant. Invinity Energy Systems has installed hundreds of vanadium flow batteries around the world. They include this 5 MW array in Oxford, England, which is operated by a consortium led by EDF Energy and connected to the national energy grid. Credit: Invinity Energy Systems.

Are vanadium-based flow batteries a good choice for energy storage?

Strength: Vanadium-based flow batteries are well-established and trusted within the energy storage industry, with multiple vendors providing reliable systems. These batteries perform consistently well, and larger-scale installations are becoming more common, demonstrating their ability to meet growing demands.

Who is the world's biggest vanadium flow-battery supplier?

The Anglo-American firm Invinity Energy Systems claims to be the world's biggest vanadium flow-battery supplier; it has more than 275 in operation and a growing number of projects planned. The company builds its batteries inside 6 m long shipping containers, making them easy to transport and ready to plug in once on site.

Why are vanadium redox flow battery systems important?

Battery storage systems become increasingly more important to fulfil large demands in peaks of energy consumption due to the increasing supply of intermittent renewable energy. The vanadium redox flow battery systems are attracting attention because of scalability and robustness of these systems make them highly promising.
