

European Energy Storage Power Supply Procurement Latest

Overview

As the Clean Energy Associates' (CEA) Q2 2025 ESS Supply, Technology, and Policy Report outlines, while new policy frameworks like the EU's Clean Industrial Deal State Aid Framework (CISAF) are designed to accelerate domestic energy storage production, a wave of cancelled or delayed projects suggests that economic headwinds and global supply pressures are undermining Europe's manufacturing vision. What is the European energy storage inventory?

The Commission's European Energy Storage Inventory can help address this gap within Europe. Launched in March 2025, it is the first European-level tool of its kind, providing a real-time dashboard of energy storage levels in Europe, offering energy storage data across a full range of technologies.

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Which countries are moving forward with battery energy storage system procurements?

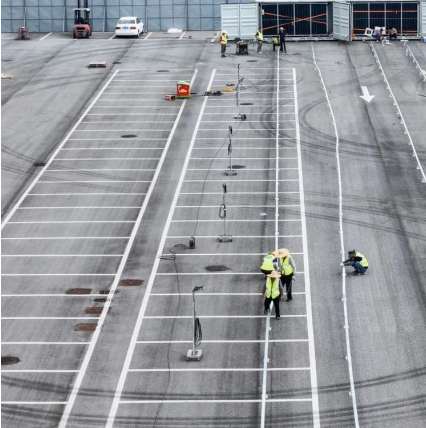

Portugal and Moldova have moved forward with battery energy storage system (BESS) procurements with funding from the EU and USAID.

Why should the EU invest in batteries?

It contributes to the EU's circular economy and zero pollution ambitions and strengthens our strategic autonomy on batteries. Beyond batteries and pumped storage hydropower, the EU ranks second, after the U.S., in the number of companies developing novel energy storage technologies and leads in liquid air energy storage.

European Energy Storage Power Supply Procurement Latest

[Outlook for energy storage battery prices and key ...](#)

Dec 4, 2025 · LFP will remain the lowest-cost battery storage chemistry this decade as technology offsets rising near-term materials prices Europe needs scale, automation, improved yields and ...

[Europe's Latest Energy Storage Detailed ...](#)

May 14, 2023 · The day-ahead price of electricity in the EU currently adopts a marginal pricing mechanism, that is, under the current power demand, the ...

In focus: Supercharging the transition with energy storage ...

Sep 16, 2025 · While renewable energy sources can't be depleted in the same way as fossil fuels, they are 'variable', meaning their availability fluctuates. That's where energy storage solutions, ...

Energy

6 days ago · The EU Energy and Raw Materials Platform is an initiative developed for European companies, with the aim to leverage the size and ...

[European BESS: 105 MWh for Greece, 65 ...](#)

Dec 17, 2024 · Greece is getting four new battery energy storage systems (BESS) amounting to 105 MWh, while Germany's Intilion will develop 65 ...

[Rapid expansion of Europe's storage - new report](#)

Apr 8, 2025 · The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights ...

[New report: "EU energy storage action plan needed"](#)

May 26, 2025 · New analysis reveals another year of record installations for European battery storage, despite slower year-on-year growth, according to the latest European Market Outlook ...

[Portugal and Moldova progress 575MW of ...](#)

Jan 22, 2025 · Portugal and Moldova have moved forward with battery energy storage system (BESS) procurements with funding from the EU ...

[New EU Platform to Boost Hydrogen and Raw ...](#)

Jul 17, 2025 · The EU's new Energy & Raw Materials Platform is now live--starting with a Hydrogen Mechanism to match supply and demand, ...

[Europe risks instability without smart energy storage](#)

6 days ago · Failing to embed these capabilities now will cost countries later. Retrofits, power outages, missed value, and grid instability will plague Europe's energy infrastructure. ...
