

# **Exchange on Mobile Energy Storage Containers Used at Construction Sites in New Delhi**

## Overview

---

Is India's first regulated utility-scale battery energy storage system online?

India's first commercial regulated utility-scale battery energy storage system (BESS) is now online. The 20MW/40MWh standalone system, developed by IndiGrid, was commissioned in Delhi on April 4.

Can energy storage accelerate India's energy transition?

Energy storage has the potential to meet these challenges and accelerate India's energy transition. The potential for storage to meet these needs depends on many factors, including physical characteristics of the power system and the policy and regulatory environments in which these investments would operate.

What is a research roadmap for decentralised energy storage for India?

jects or that are contained in the analyses conducted. One research roadmap for decentralised energy storage for India has been developed by a Forum comprising prominent Indian research institutes and experts, ensuring the representation of women. Specific thematic sub-groups are created on technology selection, standards, assessment models, battery.

What are the challenges faced by India's energy storage system?

lock reliability. Current storage costs pose challenges. Grid infrastructure expansion must align with renewable capacity additions to prevent congestion. The Government of India set up a 'Round-the-Clock' tender to combine renewable energy with storage, yet implementation is pending. Introducing storage systems at various

## Exchange on Mobile Energy Storage Containers Used at Construction
