

Fiji Battery Energy Storage Production Company

Overview

What are the different types of energy solutions in Fiji?

Delivering secure, cost-effective hybrid and utility grade power solutions, for today and the future. Our specialities in Fiji include Solar Energy, Renewable Energy, Hybrid Energy, Distributed Generation, Energy Storage, Off-Grid Energy, Remote Communities, HV, Substations, Grid Connections, Battery Energy Storage Systems (BESS), and Microgrid.

Why do businesses use solar energy in Fiji?

With on-site solar energy generation in Fiji, businesses can generate their own electricity and become less vulnerable to power outages, grid disruptions, and energy supply constraints. Many organisations in Fiji switch to solar energy as part of their commitment to sustainability and reducing their carbon footprint.

How does a battery energy storage system work on Taveuni?

Construction of the 1MW grid-connected solar photovoltaic farm coupled with a battery energy storage system (BESS) on Taveuni. The battery storage system augments grid stability and reliability by storing surplus solar energy for use during periods of low generation or high demand while also providing backup power during outages.

Where is Fiji's New solar plant located?

This new solar plant is situated at the Mua Research Centre in the north of Taveuni, an international centre for palm and coconut research owned by the Fijian Government and is poised to bolster the island's existing generation capacity.
