

Finland solar container battery subsidies

Overview

Where can I find information about energy investment subsidies in Finland?

Website of Business Finland: First application round for energy investment subsidies On 4 October 2022, the Ministry of Economic Affairs and Employment made the first energy investment aid decisions under Finland's Recovery and Resilience Plan to promote clean energy solutions. Aid was granted to six projects totalling EUR 99.8 million.

What is Finland's energy subsidy scheme?

The aim of the subsidy scheme is to promote energy investment and energy infrastructure projects that are in line with the Sustainable Growth Programme for Finland and that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target.

Does Finland pay for solar power?

Finland is one of the few countries where solar power, in many cases, does not receive any subsidies , although companies and communities may apply for energy aid for smaller-scale (<5 MW) solar PV projects, which covers 15 % of the investment costs .

What happened to Business Finland's Energy Aid for 2023?

Business Finland's Energy Aid for 2023 has ended in its basic form. TEM has granted additional authorization to be used in 2023 with the following restrictions: Energy Aid is granted primarily to projects that promote new technology and its commercial utilization and secondly to investments related to energy efficiency.
