

Fire station folding container fixed type transaction

Overview

What is a firefighter storage container?

Portable storage containers are ideal structures for fire departments to conduct firefighter training. Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs.

Do stationary fire structures use shipping containers?

All our stationary fire structures utilize shipping containers as the main building block. By using containers, you can easily customize the layout and configuration of your structures to replicate different building types and challenges, enhancing the effectiveness of training exercises.

What is a stationary fire training system?

These training systems, typically modified with burn chambers and other firefighting equipment, offer realistic environments to simulate various emergency scenarios. All our stationary fire structures utilize shipping containers as the main building block.

Can you use shipping containers to build custom firefighter training structures?

Here's a few benefits in using shipping containers to build custom firefighter training structures. Using shipping containers for firefighter training is probably the most cost-efficient option there is. Used shipping containers are low-cost to purchase and can be modified in any way the fire department sees fit.
