How much solar power does Iraq have?

According to the International Renewable Energy Agency, Iraq has an installed PV capacity of only 216 MW despite a huge solar potential. No additional solar power has been deployed in the country in the past three years.

Will Iraq's solar farm pave the way for future solar projects?

The success of the TotalEnergies solar farm could pave the way for future solar and wind projects across the country. The TotalEnergies 1 GW solar project in Iraq is more than a milestone for renewable energy — it's a clear signal of Iraq's commitment to sustainable development and energy security.

How much solar power does Iraq have in 2023?

According to the latest statistics by the International Renewable Energy Agency, it had just 1,599 megawatts of renewable energy capacity at the end of 2023. Iraq has abundant untapped solar resources that could allow it to achieve its target and reduce reliance on imports of electricity.

Will Iraq's first solar farm become a reality?

TotalEnergies has officially launched construction on Iraq's first utility-scale solar farm — the TotalEnergies 1 GW solar project in Iraq — marking a major step forward in the nation's renewable energy ambitions. Located in the southern oil hub of Basra, the first phase of this large-scale project will soon become a reality.
