

Georgetown solar Glass Project

Overview

What is the Georgetown solar project?

The Georgetown Solar Project is a 278 MWdc solar photovoltaic project located in Vulcan County, Alberta, Canada. The project has completed all field work, obtained Power Plant and Permit & License approvals by the AUC for the construction, operation, and interconnection of the project to the Alberta Interconnected Electric System.

Who owns Georgetown solar PV Park?

The project is being developed by Georgetown Solar and is currently owned by Metka EGN with a stake of 100%. Georgetown Solar PV Park is a ground-mounted solar project which is planned over 710 acres. The project is expected to supply enough clean energy to power 30,000 households. The project construction is expected to commence from 2024.

Where is Georgetown solar located?

Georgetown Solar Inc. is developing a 230-megawatt (MWac) solar project located 11 kilometres south of Carseland, Alberta in Vulcan County. The Project encompasses 700 acres (400 soccer fields) and has been sited on privately owned cultivated farmland.

How many homes will the Georgetown solar project power?

Once operational, the Georgetown Project is expected to generate enough electricity to power approximately 42,550 homes. The Georgetown Solar Project is a 278 MWp solar photovoltaic project located in Vulcan County, Alberta, Canada.
