

Georgia Power Construction solar Panels

Overview

How many new solar projects are being built in Georgia?

ATLANTA, Ga. (WTOC) - Georgia Power is moving forward with five new solar projects across the Peach State, after receiving approval from the Georgia Public Service Commission.

How much do solar panels cost in Georgia per watt?

In Georgia, you can expect to pay around \$2.98 per watt of installed DC power for solar panels.

What are the largest solar installations in Georgia?

One of the largest solar installations in Georgia is Butler Solar Project 103. As the average cost of solar drops and more large solar projects come online, more and more Georgia residents will be able to use clean, renewable energy in their homes, even without installing rooftop solar. The passage does not provide a complete list, but mentions one notable installation.

What is Georgia Power's simple solar program?

Georgia Power's Simple Solar program allows all customers to support and foster the growth of solar energy by enabling Georgia Power to purchase and retire Renewable Energy Credits (REC) generated from solar energy resources.
