

Georgia mobile power box specifications and models

Overview

Are GMs power boxes UL listed?

All power boxes come standard with the correct 30 Amp overcurrent protection. All power boxes are UL Listed in the USA and Canada. It is our goal at GMS to provide you with simple power solutions that will save you time and exceed your expectations. Copyright © 2025 GMS DISTRIBUTION, INC. All Rights Reserved.

What is a GMS power distribution center?

Our primary goal is to save our customers (contractors) time and money by providing the industry with an easy source of electricity for their equipment. Designed by an electrician, GMS's Portable Power Distribution Centers (the "G-Unit") are small, compact, lightweight, colorful and easy to use.

Are all power boxes GFCI insulated?

Every power box has been engineered to provide you the very most electrical protection while offering numerous choices for power options. All 20 Amp outlets are GFCI equipped and the enclosure is insulated (NOT METAL) to protect against personal electric shock. All power boxes come standard with the correct 30 Amp overcurrent protection.

What is the purpose of the Georgia Power Company metering book?

It is intended to provide guidance regarding the design and installation of electric services and revenue metering equipment on the Georgia Power Company system. When SAFETY is involved the policies contained in this book shall be followed.
