

# **Hargeisa Battery Energy Storage Revenue Growth**

## Overview

---

How much money does enervis battery storage generate per month?

On average, battery storage systems generated just over €12,600 per megawatt per month in the past year, amounting to approximately €151,000 per megawatt annually. In line with the historical methodology, the enervis Battery Storage Index also provides a forward-looking view of revenue expectations for the current year.

Will enervis operate a stand-alone battery storage system in 2025?

Based on enervis' latest electricity price forecasts for the intraday and balancing power markets, the operation of a typical stand-alone battery storage system in 2025 has been modelled. The achievable revenues for the full year 2025 are still based on our Current Efforts Scenario Q2/2025; no update to the scenario was made this month.

When did enervis publish a battery storage index?

Since the first quarter of 2025, we at enervis have been publishing a monthly Battery Storage Index based on historical market data. The first publication of the index was presented in an initial article in March 2025.

When did the battery storage index come out?

The first publication of the index was presented in an initial article in March 2025. The index illustrates revenue opportunities for battery storage systems by accounting for participation in both the intraday and balancing power markets. It provides an overview of achievable revenues for each of the past 13 months.
