What is the highest value supercapacitor?

Highest value supercapacitor has been made by Ningbo CSR Technologies, China. It is 30,000 Farads 2.8 V, and are intended for their buses, which will run 10 km with 1 minute charge. In terms of short term power with high energy, it is the capacitor bank installed at Dresden Laboratory.

How many volts does a supercapacitor have?

The capacitance of a supercapacitor is more than 15 million times more than the self-capacitance of the entire planet earth, which is only approximately 710 F. The maximum charge voltage of a supercapacitor is typically between 2.5 and 2.7 volts, in contrast to the high maximum working voltage that a conventional electrostatic capacitor may have.
