

Home energy storage subsidies in Aarhus Denmark

Overview

What has the Danish Energy Agency learned from the previous CCS funds?

These changes are based on new insights from the Danish Energy Agency's public consultation and experiences from the two previous CCS funds. The most important lesson learned is that the market actors need more time for the commissioning of facilities, the acquisition of storage permits and the establishment of the value chain.

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How many permits does Denmark have for CO₂ storage?

Denmark has six permits for exploration with the aim of CO₂ storage. Denmark has political agreements with several countries for cross-border transport of CO₂ for geological storage beneath the seabed. Implementation of the total CCS fund is contingent upon state aid approval from the European Commission.

When will the Danish Energy Agency publish the tender material?

The Danish Energy Agency expects to publish the tender material in October 2024 and award contracts in April 2026 following a prequalification and negotiation round. See the public consultation material on the Danish Energy Agency's website.
