

Home installation of solar panels

Overview

Can solar panels be installed on a roof?

In-roof installations allow the solar panels to be mounted as part of the roof structure, similar to a velux window. Solar tiles are also an option for a domestic roof, replacing the existing tiles.

How do I install a solar energy system?

To transport and install, disconnect the power connector from the Base Station or Repeater. To clean, use a wet cloth and soap. Do not use abrasives or other chemical cleaners. The Solar Energy System needs to be installed outside with the Base Station (Repeater) nearby, in a place with full sunlight.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.
