

# How big is the generator of the Amsterdam solar power station

## Overview

---

How much solar energy will Amsterdam generate in the next decade?

The Regional Energy Strategy (RES) presented by the mayor and aldermen on Wednesday shows that Amsterdam aims to generate 127 megawatts of wind energy, 400 megawatts of solar energy on large roofs, and 150 megawatts of solar energy on small roofs when the next decade arrives.

Are solar panels a good idea for Amsterdam?

Solar panels contribute to Amsterdam's goal of reducing carbon emissions and transitioning to renewable energy sources. By harnessing sunlight, they provide a clean energy alternative to fossil fuels, helping to combat climate change.

What are energy communities in Amsterdam?

Energy communities in Amsterdam involve residents, businesses, and stakeholders working together to produce, share, and manage renewable energy. These initiatives focus on boosting sustainability, lowering energy costs, and empowering local decision-making.

Can Amsterdam residents install solar panels on their own roofs?

Amsterdam also wants to make it as simple as possible for Amsterdam residents to install solar panels on their own roofs. Companies will also be generously supported. The city hopes to achieve 150 megawatts of energy generation in this way. "Nowadays, the municipality only facilitates owners of large roofs.
