

How long do rooftop solar panels last

Overview

Do solar panels need to be replaced after 25 years?

After 25 years, your solar panels won't necessarily need to be replaced; however, their ability to absorb sunlight will be reduced. In this blog, we'll explain how long solar panels last, review solar panel degradation rates, and ways to make sure your solar panels last as long as possible.

How long do solar panels last?

Connect with a local solar provider for maintenance and repairs. Solar panels generally last for 25 to 30 years; they can produce power after this, but at a significantly lower rate than their original output. Maxeon's warranty covers its panels for 40 years. Solar panels slowly degrade, resulting in less and less electricity production over time.

When does a solar panel expire?

The "20% rule" refers to the point at which a solar panel has lost around 20% of its original efficiency, usually after 25 to 30 years of use. Panels are generally considered to have reached the end of their warranted life once they drop below 80% of their initial performance.

How long do solar inverters last?

Solar inverters have a typical service life of 10 years. This means your solar panels will still have 15 years of guaranteed power output when your first inverter reaches the end of its service life. If you're considering a solar power system with energy storage, home batteries also have a typical service life of 10 years.
