

# **How many 5G base stations does Reykjavik Communications have now**

## Overview

---

How many 5G base stations are there in Japan?

Japan had over 100,000 active 5G base stations by 2023. Japan's 5G network is expanding rapidly, with over 100,000 active base stations by 2023. The country has taken a strategic approach, focusing on major urban centers first and gradually expanding to rural areas.

Which country has the most 5G networks in the world?

South Korea is another leader in 5G adoption. With over 200,000 active base stations, the country boasts nearly 90% population coverage. This has made South Korea one of the most connected nations in the world, with advanced use cases in entertainment, healthcare, and finance.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

Which countries have extensive 5G coverage?

The countries with the most extensive 5G coverage include India, which has rapidly expanded its 5G network in the last two years, and much of Europe. Notably, India's neighbors like Pakistan, Myanmar, and even large parts of China have less 5G coverage. In Europe, good coverage extends up to Ukraine, Belarus, and into Russia.
