

How many energy storage power stations are there in Jakarta

Overview

There are 55 Power stations in Jakarta as of October 15, 2025; which is an 3.77% increase from 2023. How many power stations in Jakarta?

There are 55 Power stations in Jakarta as of January 23, 2025; which is an 3.77% increase from 2023. Of these locations, 48 Power stations which is 87.27% of all Power stations in Jakarta are single-owner operations, while the remaining 7 which is 12.73% are part of larger brands. Average age of Power stations in Jakarta is 4 years and 6 months.

What kind of energy does Jakarta use?

Jakarta's energy system relies heavily on fossil fuels, in particular natural gas (49%), crude oil (28%) and coal (19%). Most electricity is generated from coal-fired power plants, while gasoline and diesel are the main fuels for private vehicles and motorcycles.

Why do Indonesians need energy storage?

Indonesia's focus on industrial growth creates a demand for reliable power. BESS can offer backup power, improve power quality, and enable cost savings through peak shaving. The Indonesian government recognizes the importance of energy storage.

What is Jakarta's energy plan?

Developing renewable energy sources is a critical component of Jakarta's energy plan. The city is focusing on solar energy, WtE conversion and emerging technologies, such as wind power and hydrogen-based electricity generation.
