

# How many generators are there at the Yerevan power station

## Overview

---

Where is Yerevan 1 power station?

Yerevan 1 power station (Ереванская ТЭЦ-1) is an operating power station of at least 242-megawatts (MW) in Yerevan, Armenia. It is also known as Yerevan TPP. The map below shows the exact location of the power station. Loading map. Unit-level coordinates (WGS 84): CHP is an abbreviation for Combined Heat and Power.

Why did the output of the Yerevan power station decrease in 2023?

In 2023, the output at the Yerevan 1 power station decreased by 22%, while at the Yerevan 2 power station it increased by 50%. The reason lies in the obligations that the state undertook when it signed a contract with the shareholders of the station – the Italian company Renco and the German company Siemens – several years ago.

How much does Armenian energy project cost?

The construction is estimated to cost USD 250 million. “The two-month negotiation over financing that lasted have ended successfully in the signing of the agreement,” Garegin Baghramyan, Armenian acting energy infrastructures and natural resources minister, said at a news conference.
