

How many solar panel manufacturers are there in Australia

Overview

Who makes Australian solar panels?

International solar panel manufacturers like Canadian Solar, Longi Solar, JinkoSolar, and Hanwha Q Cells continue to shape Australia's renewable energy landscape. With their strong global reputations and advanced technologies, they provide Australian homeowners and businesses with reliable, efficient, and future-ready solar solutions.

What percentage of solar panels are made in Australia?

Australia currently manufactures around one per cent of the solar panels installed across the country.

Why are solar panels so popular in Australia?

This consistent demand underscores the opportunity for locally manufactured panels, especially those designed for tough Australian conditions. The Australian government sees this potential and is actively fostering a supportive environment for domestic solar manufacturing as a vital part of its 'Future Made in Australia' vision.

How many solar PV installations are there in Australia?

As of 30 June 2025, there are over 4.16 million PV installations in Australia, with a combined capacity of over 41.8 gigawatts. The following graphs show the rated capacity of solar PV installed in each month. The rate of installations has been influenced by changes in the policy mechanisms that have supported this technology.
