

# How many stations does Hydrogen Energy have

## Overview

---

How many hydrogen refuelling stations are there worldwide?

According to the latest figures from LBST's H2stations.org report, the number of operational hydrogen refuelling stations worldwide has officially crossed the 1,000 mark. Specifically, by the end of 2024, around 1,160 stations were up and running – an impressive milestone for an industry once viewed as the distant future of clean mobility.

How many hydrogen stations are there in Europe?

Notably, South Korea added 25 stations – its third consecutive year at that pace – reinforcing its position as a major hydrogen hub. Europe saw its station count rise to 294, with Germany at 113 and France at 65. The Netherlands reached 25 stations, while Bulgaria and Slovakia each opened their very first stations in their capitals.

Which countries have the most hydrogen stations?

(Image: H2stations.org) Asia leads by a wide margin, boasting 748 active stations. China accounts for the largest share at 384, followed by South Korea with 198 and Japan at 161. Notably, South Korea added 25 stations – its third consecutive year at that pace – reinforcing its position as a major hydrogen hub.

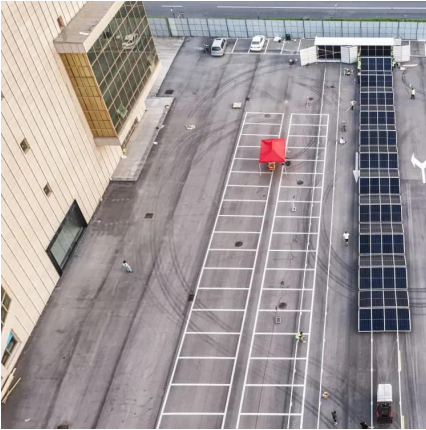

How many hydrogen refueling stations are there in 2023?

The HRS supply chain comprises numerous regional and global operators. London, 24th May 2024 – By the end of 2023, a total of 1,068 hydrogen refueling stations (HRS) were in operation in 35 countries worldwide, as growth of hydrogen-powered transport continues, new research from Interact Analysis shows.
