

# How many watts is equivalent to a 200m solar light

## Overview

---

How many lumens does a solar light need?

Solar lights with 15-30 watts and 1000-3000 lumens provide enough light to cover larger areas while ensuring security and visibility. For Streets and Roadways: Street lighting requires even more brightness, with wattage ranging from 30-60 watts and lumen outputs between 3000 and 6000 lumens.

What is lumens & Watts?

The measure of the brightness of a light fixture is lumens, not watts. Lumens are the measurement of visible light energy. The higher the number of lumens, the brighter the light. Lighting fixtures used for illumination are usually labeled with their light output (in lumens), which is legally required in many jurisdictions.

Are Watts a unit of brightness?

Since we have traditionally used incandescent light bulbs, we are accustomed to using watts as a unit of brightness, but this is incorrect. The measure of the brightness of a light fixture is lumens, not watts. Lumens are the measurement of visible light energy. The higher the number of lumens, the brighter the light.

How many lumens does a solar street light need?

More lumens mean a brighter light. For example, pathway lights typically need 50-200 lumens, while solar street lights may require 2000-10,000 lumens depending on the application. When you think of solar lights, the first number that might catch your eye is “watts.”
