

How many watts of solar panels are there in Mumbai India

Overview

What is India's solar power capacity?

Solar energy made up 61.29% of this renewable capacity and accounted for 22.23% of India's overall installed power capacity. This marked a 29.13% increase compared to the previous year, reflecting the rapid growth in solar installations. India's total installed power capacity grew by 7.52% year-over-year, reaching 475 GW in March 2025.

Which country has the highest installed solar capacity in India?

Rajasthan leads with the highest installed solar capacity at 27.3 GW. Explore India's rapid growth in renewable energy and solar power expansion. The generational solar capacity include Ground based plant, Solar rooftop and hybrid projects. Cumulative : 100.32 GW.

How many solar panels are installed in India in FY2025?

In FY2025, about 17.4 GW of utility-scale solar capacity and another 5.15 GW of rooftop solar capacity were added in India. In FY2025, the top three states with maximum installed solar capacity were Rajasthan (6.5 GW), Gujarat (3.6 GW), and Maharashtra (2.3 GW).

How much solar power does India have in 2023?

According to the latest figures, the country's installed solar power capacity has soared from 2.82 GW as of March 31, 2014, to an impressive 73.32 GW by December 31, 2023. This significant increase underscores India's steadfast commitment to expanding its renewable energy portfolio and reducing dependence on traditional fossil fuels.
