

# How much does 100kw solar energy storage cost

## Overview

---

How much money can a 100kW solar system save?

On average, a 100kW solar system can save up to \$31,025 per year. Over the 25-year lifetime of the solar panels, this equates to a total savings of \$775,625. The cost of electricity has seen a staggering increase of 270% over the past 40 years. This rise in electricity costs is depicted in the chart below:  
Source: U.S. Bureau of Labor Statistics.

Should you invest in a 100kW Solar System?

Investing in a 100kW solar system can be highly beneficial, especially if you live in an area with decent sun exposure. With the potential to generate \$31,025 worth of electricity annually, you can expect a 20% return on your investment based on the current costs of solar panels (\$200,000 for the system).

How much does a solar system cost?

Based on current electricity costs, you can expect a 20% return on investment per year on your solar panels. The typical cost for a 100kW solar system is approximately \$200,000. However, it's important to note that prices for solar systems have come down substantially over the past 10 years. Source: The National Renewable Energy Laboratory (NREL).

Does a 100kW Solar System have battery backup?

When considering a 100kW solar system, it's important to consider whether you would like to incorporate battery backup. There are two main types of batteries to choose from: lead acid and lithium polymer. For a 100kW system with battery backup, the sizing requirements are as follows:
