

How much does an solar container outdoor power cost in Surabaya Indonesia

Overview

How much energy does a solar system produce in Indonesia?

Solar panels only produce energy when there is direct sunlight. In Indonesia, this translates to roughly 4.2 kWh of energy per kW installed. In an off-grid solar system, storage batteries are required to allow you to access solar energy for an entire day.

How much does a solar system cost in Indonesia?

The average pricing of a solar system in Indonesia is IDR 15 - 21 million per kWp installed and even less if for larger installations. For the batteries, you can expect to pay an additional IDR 10 - 12 million per kWh for LifePO4 lithium batteries, which give you the biggest bang for your buck.

How much energy does a solar panel produce in Bali?

Remember, solar panels need direct sunlight to produce energy! In Bali, Lombok, and many parts of Indonesia, this translates to an average of 4.2 kWh (kilowatt-hour) per kW of solar installed. When there is cloud cover or rain, your power output will drop. At night, it won't produce any energy at all.

How much energy does an off-grid Solar System use in Indonesia?

In Indonesia, this translates to roughly 4.2 kWh of energy per kW installed. In an off-grid solar system, storage batteries are required to allow you to access solar energy for an entire day. You can also add on a smart control system to allow you to monitor and control your electricity consumption and prolong your battery life.
