

# How much does it cost to be a secondary agent for solar panels

## Overview

---

While costs can vary between jurisdictions, estimates suggest that initial licensing fees typically range from \$500 to \$2,000, depending on state mandates and the agent's business model, particularly when it involves contracting or installing solar systems. How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses.

Are solar panels a good investment?

Installing solar panels can be one of the most impactful improvements you can make - allowing you to take control of electricity bills, protect your home from outages and increase the value of your property while producing energy directly on the roof. How much does it cost to install and manage solar panels?

.

Does getting less sun increase the cost of solar panels?

While getting less sun at various times in the year does not increase the cost of owning solar panels, it can affect how much you save. More advanced and durable solar panels, batteries, and inverters may cost more upfront, but typically last longer and perform better than cheaper options.
