

# **How much does solar container outdoor power cost per kilowatt-hour**

## Overview

---

For these containerized systems, starting at roughly 100 kWh and extending into the multi-MWh range, fully installed costs often fall in the USD \$180-\$320 per kWh range. How much does solar energy cost per kilowatt hour?

According to the US Department of Energy (DOE), the cost per kilowatt hour electricity from current solar energy technologies is high at approximately \$0.15-\$0.20/kWh if the cost of thermal energy storage is at the level of \$30.00/kWhth.

Why is solar energy cost per kWh important?

For one, the cost per kWh can be informative because it allows you to compare the cost of solar to your utility costs. The solar energy cost per kWh can also help you compare two system proposals because two systems of the same kW size could produce different total kWh because of design choices.

How much does it cost to store solar energy?

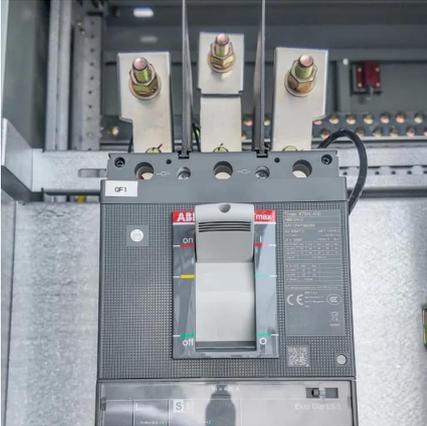

But to store that Solar energy for use as anything other than just topping up, requires a big store; more batteries. If you do this correctly and along with extra Batteries (4 x £100) you uprate the Charger unit (£185), the Alternator (£790), the wiring (£65), etc it starts working out expensive : £400 + £185 + £790 + £65 = £1440.

How much does a solar system cost in China?

Component Checklist: Solar systems in China offer exceptional value at 40-60% lower costs than Western markets. Quality systems start at ¥15,000 (\$2,100) with 6-8 year payback periods. This article will take you through solar system price in china: how much does it really cost, but the quality varies greatly by supplier and system type.
