Can a battery inverter run an RV?

Battery Inverters are designed to simply change DC power to AC so that you can run typical household appliances in your RV. Renogy's line of battery inverters can handle loads up to 700W, 1000W, 2000W, and 3000W, respectively. As the capacity increases, so does the price, and the amount of power the inverter requires to run itself.

Use a transfer switch or sub-panel to safely route the power. Simpler setups: For a more straightforward installation, simply plug your appliances directly into the inverter's AC outlets. This step depends on your RV's setup and how many devices you plan to power through the inverter.
